SUMMARY

Data & Analytics professional with 5+ years of experience in data strategy, engineering, governance, and advanced analytics. Skilled in Python, SQL, Cloud Platforms(Azure, GCP) and BI tools (Power BI, Tableau, Medallia). Proven ability to build scalable ETL pipelines, implement data governance frameworks, and derive business insights across domains. Strong foundation in statistical modeling, forecasting, and stakeholder collaboration.

EDUCATION

Master's in Business Analytics
Texas A&M University | Dallas, Texas

GPA:3.9/4

Graduated: Jul 2025

PG Diploma in Advance Computing
Center of Development in Advance Computing, India | Mumbai, India

GPA:3.7/4

Graduated: Jan 2021

Bachelor's in Electronics Engineering
University of Mumbai | Mumbai, India

Graduated: May 2017

TECHNICAL SKILLS

Certifications: Microsoft Certified: Azure Data Engineer Associate, Medallia Certified **Programming & Scripting:** Python, SQL, Spark, **Data Platforms & Tools:** Snowflake, AWS, Azure, GCP **ETL & Pipelines:** Talend, Control-M, Apache Airflow, SSIS **Visualization & BI:** Tableau, Power BI, Medallia SAAS Platform **Databases:** SQL Server, Hive, Teradata, BigQuery, RDBMS, OLAP

WORK EXPERIENCE

Graduate Research Assistant - Data Strategy & Analytics, Texas A&M University | Dallas, Texas

Oct 2024 - Jul 2025

- Led end-to-end analytics initiatives for Campus Recreation, increasing student engagement by 15% and improving operational decision-making by integrating data into strategic planning and program development.
- Built interactive dashboards in Power BI and Tableau that tracked KPIs across 5+ student programs, resulting in a 25% improvement in visit frequency insights and 30% faster reporting cycles.
- Developed predictive models in Python and SQL to forecast student traffic and monthly expenses with 90%+ accuracy, enabling 10% more efficient budget allocation and proactive staffing decisions.
- Automated data pipelines and reporting workflows from 6+ data sources, reducing manual effort by 40% and ensuring scalable, warehouse-compliant data transformation for real-time insights delivery.

Lead Business Analyst – CX Operations and Strategy, Medallia | Gujarat, India

Apr 2021 - Apr 2023

- Designed and implemented a unified account health metric by integrating data from 10+ CRM and product usage sources, resulting in a 30% boost in customer retention and satisfaction across key enterprise accounts.
- Built and deployed a predictive churn risk model, reducing churn by 18% through proactive engagement strategies, while also driving 20%+ improvement in digital customer experience (CX) for DXA, MXO, and Strikedeck clients.
- Led cross-functional project delivery for major clients (Walmart, Adobe, Frontier, PODS, Vuori), including onsite support at Adobe and Medallia Experience Event—achieving 0 critical issues, 100% on-time launches, and strong client satisfaction.
- Directed ETL-based data migrations and BI reporting, improving data refresh speed by 50%, doubling report generation capacity, and accelerating executive decision-making by 90% via dashboards in Medallia.

Business Data Analyst - Sports Analytics, Hudl India Pvt India | Mumbai, India

Jul 2017 - Feb 2020

- Conducted advanced statistical analysis on game footage and performance metrics, uncovering performance trends that led to 15% improvement in player efficiency and tactical execution.
- Built automated data pipelines from sports APIs and wearable trackers, reducing manual data entry by 40% and ensuring timely, accurate performance monitoring.
- Collaborated with coaches and analysts to convert insights into actionable training strategies, directly contributing to game-day decision-making and performance optimization.
- Developed interactive dashboards and scouting tools, enabling real-time performance tracking and enhancing recruitment decisions with custom player comparisons and data-driven scouting reports.

PROJECTS

AI-Powered Interview Assistant Chatbot

Jan 2025 - Apr 2025

- Leveraged stakeholder consultations and literature reviews to define user needs, subsequently implementing core chatbot functionalities such as role-specific question generation and adaptive feedback delivery.
- Analyzed existing interview preparation tools and user requirements to develop an AI chatbot featuring real-time communication, performance scoring, and personalized feedback.

AWS based Data Warehouse for Crime Analytics

Aug 2024 - Dec 2024

- Developed and deployed an AWS-based data warehouse for crime analytics, leveraging SSIS for ETL processes, SSMS for database management, and SQL for data transformation and analysis. Contributed to the identification and prevention of crime patterns through data-driven insights.
- Designed and implemented interactive dashboards using Tableau to visualize crime statistics and trends, enabling law enforcement to proactively address potential hotspots and allocate resources effectively.
