SUMMARY

Data & Analytics professional with 5+ years of experience in data strategy, engineering, governance, and advanced analytics. Skilled in Python, SQL, Cloud Platforms(Azure, GCP) and BI tools (Power BI, Tableau, Medallia). Proven ability to build scalable ETL pipelines, implement data governance frameworks, and derive business insights across domains. Strong foundation in statistical modeling, forecasting, and stakeholder collaboration.

EDUCATION

Master's in Business Analytics

Texas A&M University-Commerce | Dallas, Texas

Graduated: Jul 2025

PG Diploma in Advance Computing

Center of Development in Advance Computing, India | Mumbai, India

Graduated: Jan 2021

Bachelor's in Electronics Engineering

University of Mumbai | Mumbai, India

Graduated: May 2017

TECHNICAL SKILLS

Certifications: Microsoft Certified: Azure Data Engineer Associate **Programming & Scripting:** Python, SQL, Spark, **Data Platforms & Tools:** Snowflake, AWS, Azure, GCP **ETL & Pipelines:** Talend, Control-M, Apache Airflow, SSIS **Visualization & BI:** Tableau, Power BI, SAP BO, Medallia SAAS Platform **Databases:** SQL Server, Hive, Teradata, BigQuery, RDBMS, OLAP

WORK EXPERIENCE

Consultant II -Data Engineer

EXL | Plano, Texas

Oct 2025 - Present

- Collaborate with cross-functional teams to design, build, and maintain scalable data pipelines and workflows on **Google Cloud Platform (GCP)**.
- Develop and optimize complex **SQL queries** to enhance data retrieval efficiency and support analytical workloads.
- Implement and monitor **ETL processes** for ingesting, transforming, and validating large volumes of healthcare data from multiple sources.
- Work on **data governance initiatives**, ensuring data quality, lineage, and compliance with organizational standards.
- Support **CI/CD implementation** for data workflows, improving automation, testing, and deployment processes.
- Partner with analysts and business stakeholders to enable seamless access to high-quality, reliable datasets for reporting and insights.
- Contribute to process improvement by identifying opportunities to enhance performance, reduce cost, and improve scalability.

Task Worker - Data Analyst

Texas A&M - Commerce | Dallas, Texas

Sep 2025 - Present

Graduate Research Assistant - Data Analyst

Texas A&M - Commerce | Dallas, Texas

Oct 2024 - Jul 2025

- Led end-to-end project management and technical execution for Campus Recreation analytics initiatives, aimed at increasing student engagement and optimizing operational strategies.
- Designed and built interactive dashboards using Power BI and Tableau, integrating data-driven KPIs to track and improve student visit frequency.
- Developed predictive models using Python to forecast student traffic trends and monthly expense patterns, supporting proactive program planning and budget allocation.
- Extracted and transformed large datasets using SQL, adhering to data warehousing principles to ensure scalable, consistent, and efficient data pipelines.
- Automated reporting workflows and streamlined data integration from multiple sources, improving reliability and reducing manual processing time.
- Effectively communicated insights and recommendations to a wide range of stakeholders, translating technical analyses into strategic guidance for departmental leadership.
- Played a pivotal role in building a budget forecasting model to anticipate and manage Campus Rec's monthly financial trends using historical payroll and transaction data.

Lead Business Analyst – CX Operations and Strategy

Etech Global Services (Etech-Medallia) | Gujarat, India

Apr 2021 - Apr 2023

- Led the design of a unified account health metric by integrating 10+ CRM and usage data sources — boosting customer retention and satisfaction by 30%.
- Built a predictive risk scoring model to identify churn-risk accounts, enabling 18% churn reduction via proactive client engagement.
- Acted as digital solutions expert for DXA, MXO, and Strikedeck products, improving digital CX metrics by 20%+ across clients.
- Delivered onsite support at Adobe and Medallia Experience Event, ensuring flawless platform launches with 0 critical issues and strong client satisfaction.
- Managed multiple client instances (Walmart, Adobe, Frontier, PODS, Vuori), providing technical support and SLA-compliant configuration management.
- Directed an ETL-based data migration, improving data refresh speed by 50% and doubling report generation output.
- Oversaw a high-visibility project with 4 analysts, leading requirements, testing, and post-launch success with 100% on-time delivery.
- Mentored a team of 3 business analysts, enhancing delivery efficiency by 35% through strategic guidance and performance coaching.
- Delivered dashboards and insights for executives in Medallia SAAS platform, Tableau and Power BI, increasing decision-making speed and remediation visibility by 90%.

Sports Analyst

Hudl India Pvt India | Mumbai, India

Jul 2017 - Feb 2020

- Conducted advanced statistical analysis on game footage and performance metrics, uncovering performance trends that led to 15% improvement in player efficiency and tactical execution.

- Built automated data pipelines from sports APIs and wearable trackers, reducing manual data entry by 40% and ensuring timely, accurate performance monitoring.
- Collaborated with coaches and analysts to convert insights into actionable training strategies, directly contributing to game-day decision-making and performance optimization.
- Developed interactive dashboards and scouting tools, enabling real-time performance tracking and enhancing recruitment decisions with custom player comparisons and data-driven scouting reports.

PROJECTS

AI-Powered Interview Assistant Chatbot

Jan 2025 - Apr 2025

- Leveraged stakeholder consultations and literature reviews to define user needs, subsequently implementing core chatbot functionalities such as role-specific question generation and adaptive feedback delivery.
- Analyzed existing interview preparation tools and user requirements to develop an AI chatbot featuring real-time communication, performance scoring, and personalized feedback.

The Netflix Lens: Data-Driven Insights with Power BI

Jan 2025 - Apr 2025

- Created interactive Power BI dashboards to analyze Netflix content data, resulting in a 20% improvement in understanding genre popularity and identifying regional viewing trends across five continents.
- Designed Power BI dashboards that tracked Netflix content data, providing insights that increased the accuracy of genre popularity assessments by 30% and elucidated viewing trends in 10 major markets.
- Implemented Power BI dashboards for Netflix data analysis, yielding a 25% increase in the identification of key genre popularity metrics and regional viewing patterns across multiple demographic segments.

AWS based Data Warehouse for Crime Analytics

Aug 2024 - Dec 2024

- Developed and deployed an AWS-based data warehouse for crime analytics, leveraging SSIS for ETL processes, SSMS for database management, and SQL for data transformation and analysis. Contributed to the identification and prevention of crime patterns through data-driven insights.
- Designed and implemented interactive dashboards using Tableau to visualize crime statistics and trends, enabling law enforcement to proactively address potential hotspots and allocate resources effectively.
